

USER INSTRUCTIONS

Read all instructions prior to collection

Collection precautions:

Do NOT eat, drink, smoke or chew gum for 30 minutes before giving your saliva sample.

Do NOT remove the plastic film from the funnel lid.

Intended use: For the collection of human DNA from saliva samples.

Contents: Kit contains stabilizing liquid.

Warnings and precautions: Wash with water if stabilizing liquid comes in contact with eyes or skin. Do NOT ingest. See MSDS at www.dnagenotek.com.

Small cap, choking hazard.

Storage: 15°C / 30°C

Summary and explanation of the kit:

Oragene-DNA is a self-collection kit that provides the materials and instructions for collecting and stabilizing saliva specimens.

Label legend:

	Consult package insert
	Collect saliva by (Use by)
	In vitro diagnostic medical device
	Catalog number
	CE Marking
	Caution, consult instructions for use
	Storage instructions
	Authorized Representative
	Manufacturer

Procedure:

Most people take between 2 and 5 minutes to deliver a saliva sample following steps 1 to 5.

- 1 Spit into funnel until the amount of liquid saliva (not bubbles) reaches the fill line shown in picture #1.

- 2 Hold the tube upright with one hand. Close the funnel lid with the other hand (as shown) by firmly pushing the lid until you hear a loud click. The liquid in the lid will be released into the tube to mix with the saliva. Make sure that the lid is closed tightly.

- 3 Hold the tube upright. Unscrew the funnel from the tube.

- 4 Use the small cap to close the tube tightly.

- 5 Shake the capped tube for 5 seconds. Discard or recycle the funnel.

USER INSTRUCTIONS

Read all instructions prior to collection

Collection precautions:

- Do NOT remove the plastic film from the funnel lid.
- Check sponge for damage each time before inserting into donor's mouth. Use second sponge if first sponge shows any signs of wear or tear.
- Do NOT substitute with other sponges or swabs.

Intended use: For the assisted collection of human DNA from saliva samples.

Contents: Kit contains stabilizing liquid.

Warnings and precautions:

Choking hazards:

- Small cap in collection kit.
- Plastic bag containing sponges.
- Caution should be used when inserting sponge into donor's mouth.

For supervised collections:

- Do NOT leave donor unattended.
- Do NOT allow donor to handle the sponge, small cap or packaging.
- Wash with water if stabilizing liquid comes in contact with eyes or skin. Do not ingest. See MSDS at www.dnagenotek.com.

Storage: 15°C \updownarrow 30°C

Summary and explanation of the kit:

Oragene-DNA is an assisted collection kit that provides the materials and instructions for collecting and stabilizing saliva specimens.

Label legend:

	Consult package insert
	Collect saliva by (Use by)
	In vitro diagnostic medical device
	Catalog number
	CE Marking
	Caution, consult instructions for use
	Storage instructions
	Authorized Representative
	Manufacturer

Procedure:

Ensure donor does NOT eat, drink, smoke or chew gum for 30 minutes before collecting a saliva sample.

Ensure donor is in an upright position during sample collection.

It may take up to 15 minutes to collect a saliva sample following steps 1 to 7.

- 1** Place one sponge in cheek pouch. Gently move the sponge along the gums and inner cheeks for 30 seconds to soak up as much saliva as possible.

- 2** Once sponge is saturated with saliva, insert sponge in V-notch of funnel. Wring saliva out of sponge using a twisting and pushing motion against the inner wall of the V-notch. Saliva will flow into tube.

- 3** Repeat these steps (1 to 2) USING THE SAME SPONGE until the liquid saliva (not bubbles) reaches the fill line. Check sponge for damage each time before inserting into donor's mouth. Use second sponge if first sponge shows any signs of wear or tear.
Tap tube bottom against hard surface to reduce number of bubbles.

- 4** Hold the tube upright with one hand. Close the lid with the other hand (as shown) by firmly pushing the lid until you hear a loud click. The liquid in the lid will be released into the tube to mix with the saliva. Make sure the lid is closed tightly.

- 5** Hold the tube upright. Unscrew the funnel from the tube.

- 6** Use the small cap to close the tube tightly.

- 7** Shake the capped tube for 5 seconds. Discard the funnel and sponges.
