2. Guidelines on Authorship

Key Principles for Determination of Authorship (Referenced from International Committee of Medical Journal Editors http://www.icmje.org/urm_main.html)

- Authorship credit should be based on:
 1. Substantial contributions to conception and design, acquisition of data or analysis and interpretation of data
 2. Drafting the article or revising it critically for important intellectual content
 3. Final approval of the version to be published.

Authors should meet conditions 1-3.
- Acquisition of funding, collection of data, or general supervision of the research group alone **does not constitute authorship.**
- Each author should have participated sufficiently in the work to **take public responsibility for appropriate portions of the content.**

2. Guidelines on Authorship Plan

- All contributors who **do not meet the criteria for authorship should be listed in acknowledgements section.**
- Groups of persons who have contributed materially to the paper but whose contributions do not justify authorship may be listed under such headings as “clinical investigators” or “participating investigators” and their function or contributions should be described (e.g. served as scientific advisors, collected data etc)
- Because readers may infer endorsements of those listed in acknowledgements, contributors **must give written permission to be acknowledged.**

3. Publication Plan for Main Study

Paper	Proposed Timeline	Proposed Authorship
Descriptive Analysis (using PAROS data, target 13,000)	– Draft manuscript by Dec 2012	
Factors for OHCA Survival	– Draft manuscript by Dec 2012	
Cost-effectiveness of Modifiable Factors for OHCA Survival	– Draft manuscript by Dec 2012	
Combined PAROS-CARES Analysis	– Draft manuscript by Dec 2012	

4. Progress from Leads for Translation of First Network Manuscript

Steps

- Determining leads for each translated language
- Leads to determine:
 - Targeted journal(s)
 - Estimated readership (how many people will read article in journal)
- Network secretariat will help with securing the permission from Academic Emergency Medicine rights management unit
- A fee may apply. This will be determined by the authors of the translated manuscript.

4. Progress from Leads for Translation of First Network Manuscript

S/N	LANGUAGE	LEAD	ACCEPTANCE	PROGRESS
1	Japanese	Prof Tanaka	Yes	Journal of Academic Emergency Medicine (JAEM) Membership: 3,000
2	Korean	A/Prof Shin	Yes	
3	Chinese	A/Prof Ma	?	
4	Thai	Dr Nalinas	Yes	
5	Malay	Dr Sarah	Yes	
6	Turkish	A/Prof Ridvan	?	
7	Arabic	Dr Naroo	Yes	

5. Updates on Existing Studies

Authorship Sequence

The following few slides will give the proposed sequence of authorship. If there is a lack of response from any of the authors, the team can decide to change the sequence to authorship and /or remove the author(s). Where a new person not already listed meets the three conditions to qualify as an author, the team will decide the placement of this person in the authorship sequence.

This matter may be escalated to the respective Publications Committees Chairman whose decisions shall be final.
