

Paros software updates

DA-CPR Module

- Addition of DA-CPR Report
- DA-CPR form disabled if:
 - Arrest witnessed by = EMS/private ambulance
 - Location type = Nursing Home; Healthcare Facility
 - Corresponding changes to export & search results page
- Dispatch times consolidated into one cell for easier analysis

TTM Module

- Data elements:
 - Add “Date and time of ED arrival”
 - Change “Hypotension” to “Requires vasopressor for BP support?”
- TTM data exportable at App Admin level
- Sequential time/date bug fixes
- Ability for multi-hospital users to add TTM data

Searches and Exports

- Add Incident No/CAD field to search pages
- Add “Last Year” to Service Date pull-downs
- Sort search results in ascending date of arrest order
- Display all DA-CPR cases on one results page
- Add “Date Created” and “Date Last Saved” to Excel exports

PAROS Form, Reports, Roles

- City fix on PAROS form
- Addition of Multi-Agency users (Read-Only and Limited access)
- New fields on Agency Information page (Geography covered; Population)
- Add Data Scope option to EMS and First Responder CAD Times Reports
- Bulletin messaging*

Security

- Agency ID read-only after saving
- Minimum password length increased to 8 characters
- Log-in information report updates
- Email server updates

Server/Connectivity

- New server in Singapore to allow for local beta testing
 - MySQL installed
 - In process of creating database for testing
- Initial troubleshooting of connectivity issues by SCRI staff
