Emergency Department, Cho Ray hospital

Resume

1. About us
2. Paros progress until Mar 2015
3. Advantages
4. Disadvantages / limitations
5. Suggestions
6. Conclusion

1. About us

Emergency department – Choray hospital

- Biggest hospital in South of Vietnam.
- Receiving patients from 17 province-city hospitals of south of Vietnam
- ~ 300 patients / day.
- Including trauma and non-trauma cases.
- Computed data files of patients.

1. About us

EMS in Ho Chi Minh city

- Hotline : 115
- Head: “Emergency center 115 of Hochiminh city”
- With 5 satellite EM centers.
- Instant helps from 35 hospitals EM call center with EM responses.
- Ambulance: 01 doctor + 2 nurses + driver

1. About us

EMS in other cities

- Hotline : 115
- Establishing ...
- Private ambulance is preferred
- Ambulance: 1 nurse \pm 01 doctor + driver

2. Paros progress

From Aug 2014 – Mar 2015 : 50 cases

3. Advantages

- Huge number of patient admitted.
- Computed data patient files.
- Quick approach to scene (115 or nearby hospitals)
- ECG monitor and defibrillation device in ambulance.
- Airway ready.

4. Disadvantages

- Lack of EAD at public areas except Aeroport.
- No mechanical CPR device.
- Lack of observation patients who survived
- Lack of CPR education for family members
- Collecting missing data: pre-hospital or time

5. Suggestion

- Training the doctors and nurses who are involved in Paros Study data
- Classes for raising the awareness of cardiac arrest and CPR for no-medical-people.
- More EAD and how to use them.

6. Conclusion

- Paros is effective study → review about our pre-hospital care
- Keep on joining PAROS with our thought of improve our young EMS in Hochiminh City.

THANK YOU
