Study Abstract

1. BASIC INFORMATION	
Name: Chih-Hao Lin	Designation: Physician
Email: emergency.lin@gmail.com	Country: Tainan, Taiwan
2. TYPE OF REQUEST (Please select one)	
■ New Study Proposal Secondar	y Analyses Explanatory Analyses
3. STUDY TITLE	
EMS Systems – "End-of-Life" Issues	
4. RESEARCH QUESTIONS TO GUIDE LITERATURE REVIEW SEARCH	
Consider "Termination of Resuscitation" as alternative to "End-of-Life" issues in title.	
For objective of study, consider expanding scope to "to compare death issues in EMS settings	
internationally".	
Which countries have termination of resuscitation rule?	
What are the varying rules/criteria for termination of resuscitation currently in practice?	
 Are there any sociological or cultural factors that could affect the application of termination of 	
resuscitation application?	
5. ABSTRACT OF STUDY PROPOSAL	
5. ABSTRACT OF STUDY PROPOSAL	
In no more than 350 words, describe the study ur	der the given headings below.
	der the given headings below.
