

# **Asian Pediatrics Inflammatory Bowel Disease (PIBD) Research Network Group Meeting**

## **12 July 2019**

The Asian Paediatric Inflammatory Bowel Disease (PIBD) Research Network, one such clinical research network set up by SCRI, held their 4th group meeting on 12 July 2019 at the Grand Hyatt Hotel, Singapore.

At the meeting, 2 abstracts, PIBD epidemiology and Very Early Onset Inflammatory Bowel Disease (VEO-IBD) were presented. Both were accepted for the PIBD World Congress 2019 at Budapest. The team also discussed about the updates and issues of the current database, potential publications, and future studies that may be derived from the data collected. Professor Suporn from Thailand concluded the meeting by presenting her plans to organise a PIBD Masterclass in 2020 to raise awareness about PIBD in the region.

The meeting was held in conjunction with the Inflammatory Bowel Disease Centre of Excellence (IBD-COE) workshop organised by Johnson & Johnson, which has provided an education grant together with the National University of Singapore to support the members' travel to attend the meeting and workshop.
