Telephone-Assisted CPR Training Module

Welcome to TELEPHONE-ASSISTED CARDIOPULMONARY RESUSCITATION: THE RIGHT RESPONSE PRODUCES THE RIGHT OUTCOME.

Cardiac arrest is a leading cause of death around the world. This Training will provide you with an overview of the latest guideline recommendations for telephone-assisted CPR. Through stills, images, video files and narration tracks based on actual audio recordings, it offers the tools you need to identify cardiac arrest, give the phone-assisted CPR instructions as early in calls as possible, and provide continuous coaching to bystanders performing CPR. We'll give the know-how necessary for saving lives over and over again in your community. Best of luck with the course and, above all, never forget the importance of the work you do.
